

# CatSpring

## Automatic drinker

CatSpring is a **flow-through drinker**, recommended for all cats and dogs, especially for the elderly, those suffering from urinary tract diseases, fed dry food and reluctant to drink water from a traditional bowl. Guarantees **constant access for pets to filter water**, which can have a positive effect on their health. Its **minimalist, universal design** and decorative element of splashing water make it an original decoration of the apartment.

CatSpring is manufactured in Poland, which ensures the quality and **safety of plastics, serviceability and availability of replacement filters**.

# CatSpring

Automatic drinker

**Available in two versions:** with or without a motion sensor that only activates when it detects movement, such as an approaching cat.

CatSpring is also great as a **drinker for dogs.**
