

Your care, their joy

Our goal is to enhance and simplify the lives of pets and their caretakers by offering convenient, safe, and aesthetically pleasing products. Throughout this, we prioritize the welfare of pets.

We founded the Comfy brand in 2010 with the aim of creating **high-quality, safe products** for pets that would be competitive against the ubiquitous Chinese-made items flooding the market. Its history is closely linked to Aquael, a Polish family-owned aquarium company founded by Bogumiła and Janusz Jankiewicz in 1984.

For over a decade, we have been **designing and distributing products** for dogs, cats, rodents, and ornamental birds to nearly 50 countries worldwide. As pet owners ourselves, we believe in the concept of **smart pet care**, viewing it as a harmonious blend of pleasure and responsibility.

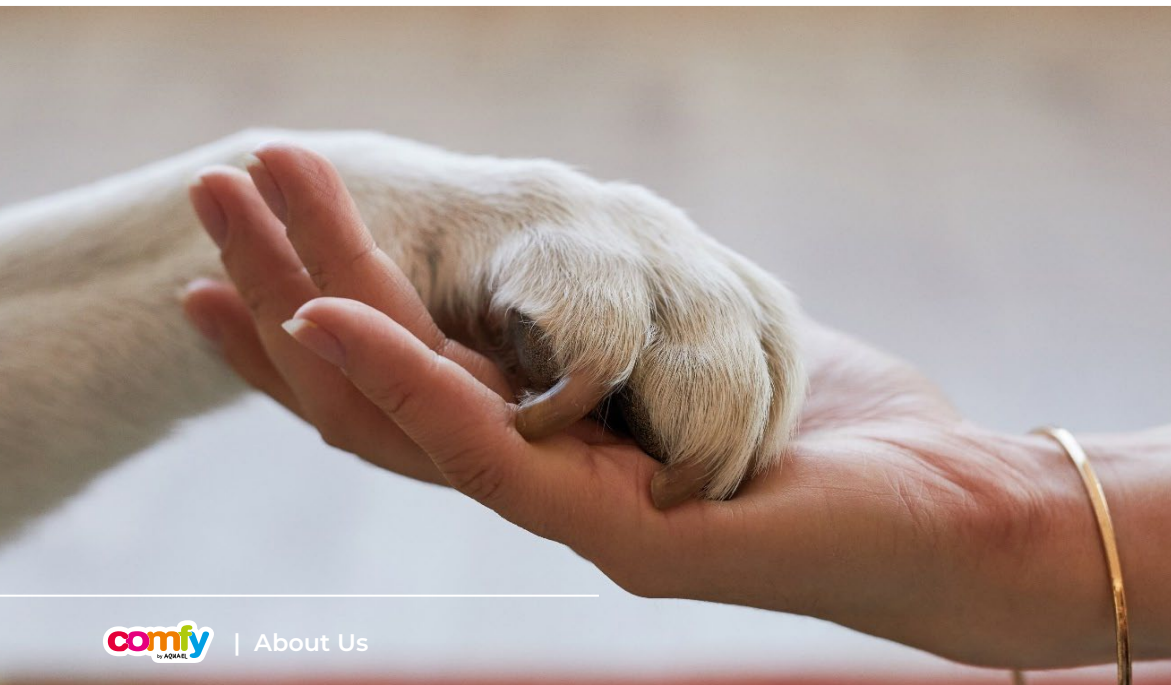

We take care of every aspect of a pet's life: rest, hygiene, travel comfort, play both at home and on walks. Our products are loved by animals and their owners – pet parents – not only in Poland, but also around the world.

Our mission is rooted in our great love and passion for animals. We want to ensure their proper care and welfare. To achieve this, we are constantly innovating and designing products to meet the various needs of pets.

The result of our work are **perfectly fitting, durable, safe products** that improve the comfort of pets, reassuring caregivers that they are giving their charges the best.

In the Comfy team, we function as a whole, within which each member plays a key role. We are committed to ensuring that every customer sees the care, attention and dedication that goes into building our brand and tailored offerings accordingly. We treat our pets, important family members and first-time users of Comfy's products, with the same care and love. They are the ones who review and approve our products to get them to the market in the best version. Just as we pet parents wish they would.

Our assortment includes a wide range of pet products – including treats, toys, substrates, hygiene products and accessories. We work with the best suppliers and use only high-quality raw materials.

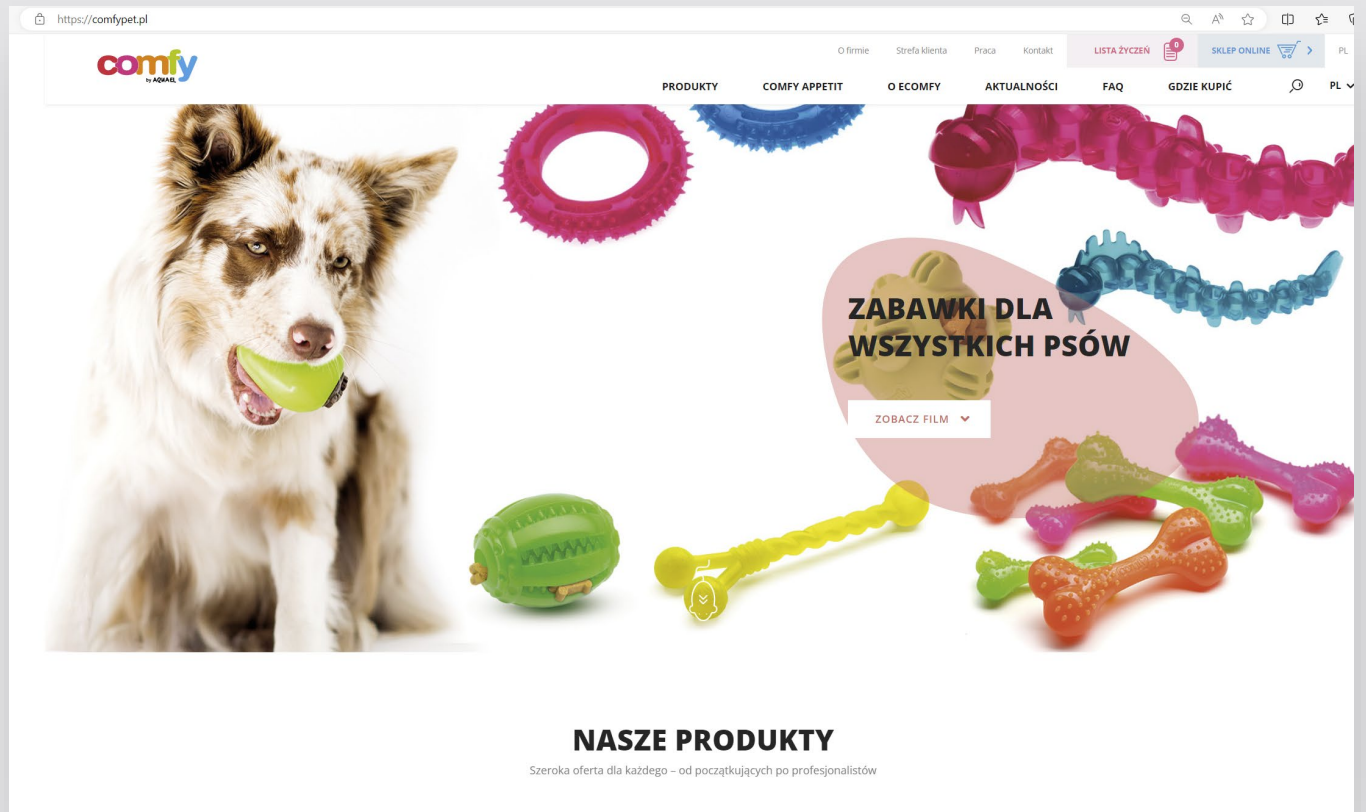

We manufacture our products in Poland, our home country, making every effort to reduce our environmental impact by making full use of solar energy resources.
