Antler Toys

NEW

Antler Toys in the shape of deer antlers are products made from a combination of safe materials approved for contact with food, with the addition of natural antler! They come in two sizes and two hardness options: soft and hard, which will be an excellent choice for dogs with strong jaws and a high need for chewing.

In each antler from the Antler line, there is an addition of **deer antler powder** and **bone marrow**, which makes dogs much more inclined to choose these toys and helps satisfy their natural need for chewing, thus promoting relaxation and reducing emotional tension in the animal.

Additionally, Antler toys are made from materials safe for animals, ensuring peace of mind for the caregiver about their pet's dental health!
